

Product Data Sheet

SoSafe™ External Surface Revival *(with mould control)*

Ideal to remove mould, moss, mildew, pollution, dirt and other discolouration on hard surfaces including concrete, pavers, wood and tiles. Actively prevents mould and moss from returning for up to 12 months.

Product Description

SoSafe™ External Surface Revival (ESR) cleans external surfaces affected by weather deterioration such as water, mould, fungus, moss and discolouration, returning the surface to its' original condition. SoSafe™ ESR's residual effect continues to protect the surface for up to 12 months after one application from mould spore and fungus.

SoSafe™ External Surface Revival is chlorine free, single part chemical with disinfecting characteristics. ESR is safe for use on almost any surface and includes environmentally friendly, biodegradable and naturally occurring ingredients. Ideal for cleaning and inhibiting mould / moss from driveways, building exteriors, pathways, outdoor furniture, weathered signs, public toilet areas, around pools and car wash units.

Characteristics

- * pH Neutral
- * Non-Flammable
- * Non-Hazardous
- * Non-Toxic
- * Non-Corrosive
- * Biodegradable

Tools / Equipment

To remove stubborn mould from difficult surfaces quickly it is recommended to have high pressure available, it is still possible to achieve great results without high pressure though a little more time maybe required.

- * Gloves
- * Brush / Broom
- * Goggles
- * High Pressure Washer

Safety

When using graffiti remover follow safety directions on the label, wear appropriate attire including - enclosed shoes, gloves and goggles.

Application Procedure

1. Mix 1 litre of External Surface Revival to 5 Litres of water (warm / hot water is desirable).
2. Apply to surface with brush or broom and leave for a minimum of ten minutes (the longer soak time the better results).
3. High-pressure clean the surface or Scrub with a wet broom, the mould / stains will become loose. Rinse surface with water.

Product Coverage

Coverage rates vary significantly depending on the porosity of the surface. 5Lt of concentrate mixed into 25Lt of water will clean 100 – 250 square metres.

Pack Sizes

3x5Lt / 25Lt
